

TUOLUMNE CITY SANITARY DISTRICT

JOB ANNOUNCEMENT

Wastewater Operator – OIT / Grade-I / Grade-II

Applications Due: October 23, 2026 by 4:00 p.m.

Our Invitation

Tuolumne City Sanitary District (TCSD) invites certified OIT, Grade I, and Grade II wastewater operators to apply to join our operations crew. Our team takes pride in providing reliable wastewater collection and treatment services that protect public health and environment for the residents of Tuolumne and the surrounding community.

Our Town

TCSD is located in charming, historic Tuolumne, a welcoming, family-oriented community of about 1,300 residents in the Sierra Nevada foothills. The area offers a peaceful mountain lifestyle with easy access to outdoor recreation, such as hiking, lakes, and nearby Yosemite National Park.

Residents take pride in the community, and TCSD plays a vital role in ensuring its waterways and environment remain healthy for generations to come.

Our District

TCSD's wastewater operations team operates and maintains Tuolumne's sewer collection system, wastewater treatment plant, and effluent storage reservoir. Responsibilities include process control, laboratory sampling, collections system cleaning/inspection,

equipment maintenance, and ensuring compliance with state regulations.

The sewer collections system collects wastewater from 700 residential and commercial connections and conveys it to TCSD's wastewater treatment plant. The collections system includes one lift station and approximately 11 miles of sewer line.

TCSD's wastewater treatment plant (WWTP) is designed to treat 1.68 million gallons per day (MGD) through an activated sludge biological treatment process. Once treated, effluent is conveyed 1.5 miles to a 300 acre-foot storage reservoir, where it is pumped to spray fields for agricultural use.

The Ideal Candidate

The ideal candidate is a responsible, reliable individual with a strong work ethic. They follow directions carefully, work well with their hands, think quickly, enjoy working outdoors, and are comfortable operating equipment.

With a desire to learn and improve, the ideal candidate quickly absorbs new information and continually seeks opportunities to grow in knowledge and skill. Strong analytical thinking and

practical problem-solving abilities are essential.

A positive, others-focused mindset and clear communication skills enable the Operator to work effectively as part of a small team and to provide professional, courteous service to the public.

Familiarity with MS Word and Excel are desired. Operators must be able to work holidays, weekends, and on-call, when needed.
