

TUOLUMNE CITY SANITARY DISTRICT

TCSD
18050 BOX FACTORY ROAD
TUOLUMNE, CA 95379

REGULAR MEETING STAFF REPORT JULY 7, 2021

PHONE: 209.928.3517
FAX: 209.928.4550
EMAIL: brendatsd@frontier.com

To: Board of Directors
From: Dave Andres, General Manager
Subject: Management Report
Date: June 29, 2021

Agenda Item: VI. b

I am currently working with staff on a number of activities. These activities include the following:

- **WWCS SRF Grant Project – Status**

District staff have been working with our consultants Black Water Engineering and Forsgren Associates on completing the final design of the Wastewater Collection System project. There are two primary issues still outstanding, 1.) a final determination as to what homes will require a “pump system” due to the inability to gravity-flow from the dwelling and 2.) whether the Tuolumne Utilities District (TUD) will participate in the project in respect to water main replacements in certain locations the district will be replacing sewer mains. In respect to number one above, staff anticipates that only two residential structures will require a pump system out of the approximately 30 residential structures that were evaluated for the relocation of their sewer laterals. On the second issue, I will be advising TUD representatives that they will need to obtain a funding commitment and notify TCSD by November 1, 2021, if they wish to participate in the district’s bidding process. This would be the last date that will allow the district to proceed with our State Revolving Fund (SRF) grant in a timely manner. Our consultants will be providing your Board an overview of the WWCS project at your August 4th, 2021 regular board meeting.

- **CSD Draft LAFCo Report Response Letter**

See staff report under Item VII.

- **Baker Ranch Sprayfield Improvement Issues**

District staff continues to work with John Baker and his siblings in respect to clearing up some property line issues around the reservoir. It is hoped that this can be concluded within the next sixty-days. In addition, staff has just received the biological report that will help determine our options for a tailwater control system at Baker Ranch. The district is having Forsgren Associates prepare a report on our options for submittal to the Central Valley Regional Water Quality Control Board.
